

CC500 - PROOFING/RETARDING CABINET

- Capacity: 20 trays in standard size;
- Stainless Steel 430 Tray Support
- Excellent thermal insulation made possible by injected expanded polyurethane in a single piece
- Simple and functional controller, programmable for heating or cooling, allowing daily and weekly programming
- Temperature sensor inside the chamber
- External Boiler comes with level sensor in the water tank, guaranteeing protection to the system in case of lack of water.
- Lower energy consumption due to the smaller internal space, reaching the desired temperature in a short time
- Optimized cooling, heating and ventilation systems, reducing energy consumption and not drying out rising bread
- Front casters with lockable wheels.
- Internal finish in 430 stainless steel.
